Where customers get stuck

CFPB complaints about Perpay and 4 credit-building and BNPL peers, Nov 2023 – Nov 2026

Ngoc Mai (Melanie) Duong

28%

of all 31,252 complaints are incorrect credit-report info, the #1 issue across the industry

34%

of Perpay's complaints are the same issue, above the industry average

100%

of Perpay complaints answered on time; the next step is fixing issues at the source

Data: CFPB Consumer Complaint Database (31,252 complaints, 5 companies) · Tools: Excel (Power Query, pivot tables), Power BI

Incorrect credit-report info is the #1 complaint, and it's even higher for Perpay

Share of all 31,252 complaints, top 7 issues

34%

of Perpay's complaints are incorrect credit-report info, vs. 28% for the industry

What goes wrong most

- Incorrect account information (43)
- Incorrect account status (35)

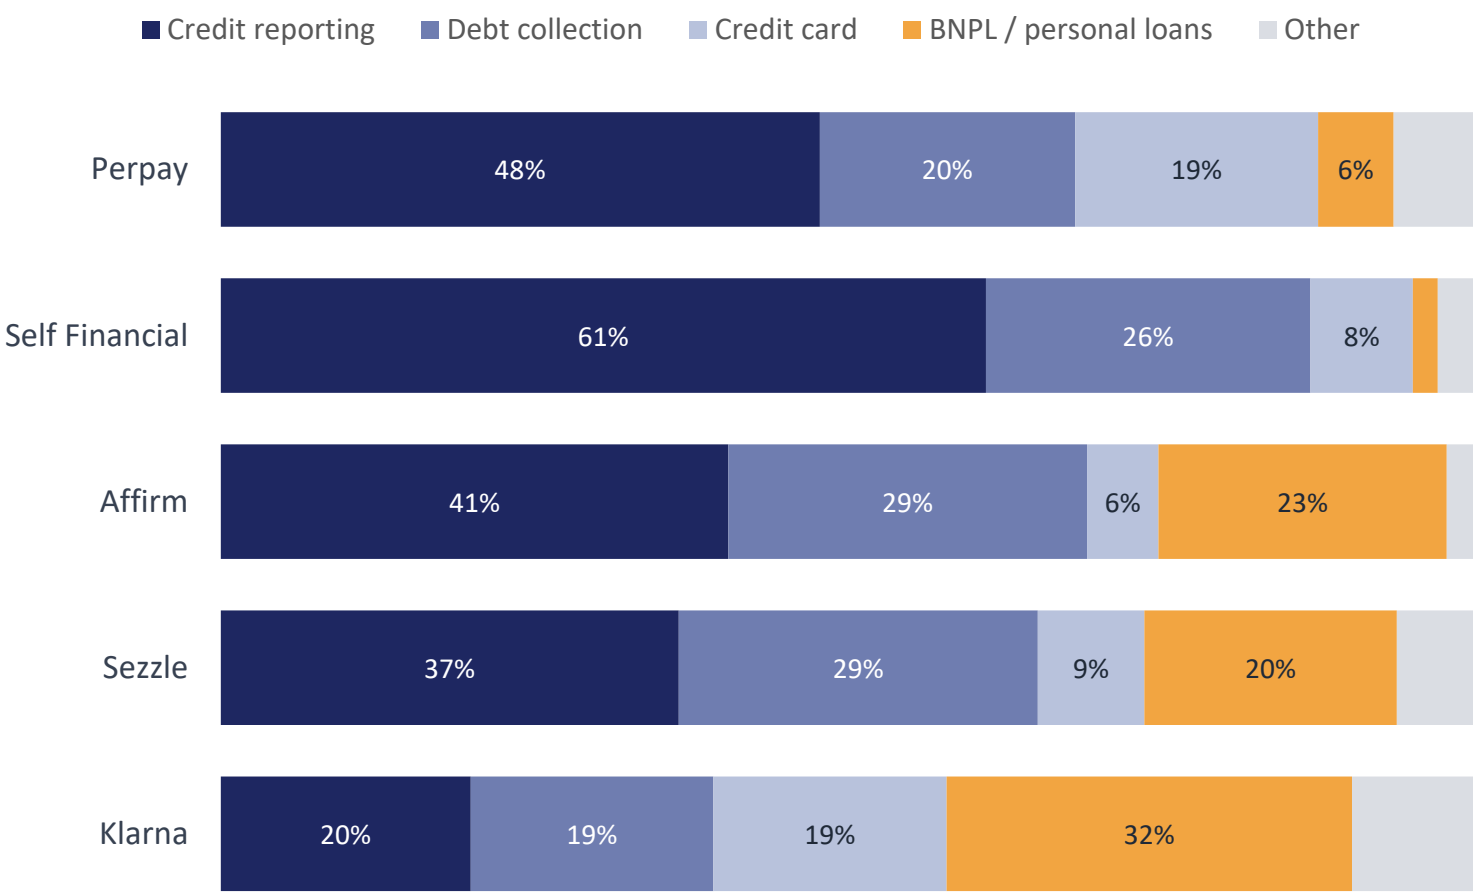

Why it matters for Perpay+

Perpay+ exists to build credit. A wrong report works against that promise and adds support work and regulatory risk.

Source: CFPB Consumer Complaint Database, Nov 2023 – Nov 2026 (31,252 complaints, 5 companies). Complaints are customer-reported and unverified.

BNPL customers complain about payments and purchases, not credit reports

Share of each company's complaints by product

32% of Klarna's complaints are about BNPL / personal loans (Perpay: 6%)

16% of Klarna's complaints are payment problems (Perpay: 1.7%)

93% Klarna's on-time response rate, the lowest of the five (Perpay: 100%)

So what

Perpay also runs a marketplace with payment plans, so these are early warnings for Merchandising and Product.

Source: CFPB Consumer Complaint Database, Nov 2023 – Nov 2026 (31,252 complaints, 5 companies). Complaints are customer-reported and unverified.

Three ways to reduce friction, one for each rotation

1 Product

FINDING

Credit-report errors are 34% of Perpay complaints, led by incorrect account info and status.

IDEA

An in-app ‘Report a credit error’ option that shows what Perpay sent to the bureaus, so customers can flag mistakes before filing a complaint.

MEASURE OF SUCCESS

Credit-report share falls from 34% toward the industry’s 28%.

2 Merchandising

FINDING

Purchase problems are 14% of Klarna complaints, an early warning for any marketplace with payment plans.

IDEA

Show clear order, shipping, and return status next to each payment, so customers always know what they bought and what they owe.

MEASURE OF SUCCESS

Purchase complaints stay well below Klarna’s 14% as the marketplace grows.

3 CS / BPO

FINDING

Perpay answers 100% of complaints on time, but on time does not always mean resolved.

IDEA

Tag each credit-report complaint by type of error and send Product a monthly friction report, so repeat problems get fixed at the source.

MEASURE OF SUCCESS

Time to resolve disputes, and fewer repeat complaints on the same issue.

Ideas to build on or make more visible, pending a review of Perpay’s current features.

Source: CFPB Consumer Complaint Database, Nov 2023 – Nov 2026 (31,252 complaints, 5 companies). Complaints are customer-reported and unverified.

What this data can and can’t tell us

Limitations

- Complaints are customer-reported and unverified.
- Counts reflect company size, so compare percentages, not totals.
- Perpay has 299 complaints, so small sub-issues are noisy.
- Partial quarters are excluded; recent data may still be updating.
- This export has no complaint narratives, so root causes come from issue categories.

Next steps with internal data

- Complaints per 1,000 active customers, for a fair comparison across company sizes.
- Link complaints to support tickets to track resolution time and repeat contacts.
- Read the narratives behind credit-report disputes to find root causes.
- Track the three success metrics from the recommendations every quarter.
